Engine Performance Testing

Emissions Source Testing
Across the Energy Value Chain

Real-Time Data for Peak Performance.

Encino operates advanced mobile emissions performance testing laboratories that are compliant with US EPA testing protocols to measure criteria pollutants and speciated GHG compounds, including methane and CO2. Our proprietary systems, managed by highly skilled Encino technicians, deliver near real-time data, expediting diagnosis and enabling the implementation of performance optimization strategies.

Cutting-Edge Mobile Labs & Technical Expertise

Encino Emissions Technicians have a combined 75+ years of experience in field compression and stack testing. Their knowledge of different engine types and manufacturers allows them to consult and guide compressor vendors in troubleshooting, tuning and better operation of their engine fleets. This results in better performance and compliance for our customers.

We pride ourselves on proactive communications and scheduling, so that clients meet their regulatory deadlines, and equipment is tested efficiently with no surprises when personnel arrive onsite.

“
If it burns fuel, we can test it!
”

Key Benefits

- ✓ Reliable and comprehensive engine testing
- ✓ Measure and understand the emissions profile of key assets and infrastructure
- ✓ Can be combined with EmVision and EmSAT, to expand measurement coverage
- ✓ Near real-time data for quick diagnosis and performance optimization

Applications

- Spark and compression-ignited engines
- Vapor combustion units
- Thermal oxidizers, heaters, and boilers
- Relative Accuracy Test Audits (RATA)

Compliance

- Louisiana Environmental Laboratory Accreditation Program (LELAP) Certification
- CAT Technical Marketing Information (TMI) Database
- Caterpillar Engine Tuner (ET) Software
- Waukesha ESM & EngCalc 3.8
- Gas Engine Rating Pro (GERP)
- eMission Control proprietary data acquisition software
- EmReport proprietary report/data deliverable macroinstruction (Microsoft Add-In)

THE ENCINO ADVANTAGE

As a service provider, we understand our role in helping clients meet their compliance obligations and achieve their environmental performance objectives. Whether you need one piece of the puzzle, or the entire picture, we can help design and tailor an emissions monitoring and performance program that fits your operational needs, corporate strategy, and budget.
