

# Instrumentation Calibration

Expert Calibration for the Tools You Rely On

## ACCURATE. COMPLIANT. LOCAL.

Instrumentation is the backbone of safe, efficient oil and gas operations. But when gauges and recorders drift out of calibration, it can lead to costly downtime, unreliable data, and safety risks. Encino's Northwest District office in Mills, WY offers a trusted local solution. Our team delivers NIST-traceable accuracy, follows ASME and ISO quality standards, and provides full calibration reports saving you time, reducing costs, and keeping your operation inspection-ready.

## Beyond Calibration: Complete Support for Your Operations

Encino Environmental is a trusted partner to the oil and gas industry, known for precision, compliance, and customer-focused service. Our Northwest District office in Mills, WY offers calibration services. That means less downtime, lower costs, and the confidence that your equipment is in the hands of experts who understand both your instruments and your industry.

Downtime costs money, which is why our local services are designed for efficient turnaround without sacrificing accuracy. And because calibration is just one part of what we do, working with Encino means you gain a partner who can support a full range of emissions testing, compliance, and operational needs.

### KEY BENEFITS:

- + NIST-Traceable standards
- + ASME & ISO-aligned procedures
- + Detailed calibration reports & service labels
- + Local, reliable service you can trust

## Why Choose Encino Environmental for Instrumentation Calibration Services?

Encino's Northwest District calibration program is designed around industry needs and regulatory standards. Here's what you can expect when you bring your equipment to our Mills, WY office:

- **Calibration of Analog Chart Recorders:** We service models such as Barton, Tech-Cal, and others commonly used in oil and gas.
- **Calibration of Pressure Gauges:** Both analog and digital gauges are tested and adjusted as needed.
- **Crystal nVision Reference Recorders:** We provide calibration and verification for these high-accuracy reference devices.
- **NIST-Traceable Standards:** All calibrations are performed against National Institute of Standards and Technology traceable references, ensuring your results are defensible and recognized industry-wide.
- **Controlled Environment:** Testing is performed under consistent conditions to ensure accuracy.
- **ASME & ISO Alignment:** Our documented procedures meet recognized quality standards.
- **Traceable Documentation:** Every calibrated unit is returned with a detailed calibration report and service label, so you have records ready for audits or inspections.

## THE ENCINO ADVANTAGE

As a service provider, we understand our role in helping clients meet their compliance obligations and achieve their environmental performance objectives. Whether you need one piece of the puzzle, or the entire picture, we can help design and tailor an emissions monitoring and performance program that fits your operational needs, corporate strategy, and budget.
